

PATENT COOPERATION TREATY

PCT

NOTIFICATION OF ELECTION

(PCT Rule 61.2)

From the INTERNATIONAL BUREAU

To:

Commissioner
 US Department of Commerce
 United States Patent and Trademark
 Office, PCT
 2011 South Clark Place Room
 CP2/5C24
 Arlington, VA 22202
 ETATS-UNIS D'AMERIQUE

in its capacity as elected Office

Date of mailing (day/month/year) 01 December 2000 (01.12.00)	
International application No. PCT/GB00/01249	Applicant's or agent's file reference JEB/MPC/4905
International filing date (day/month/year) 31 March 2000 (31.03.00)	Priority date (day/month/year) 01 April 1999 (01.04.99)
Applicant RUSSELL, Philip, St.John et al	

1. The designated Office is hereby notified of its election made:

☒ in the demand filed with the International Preliminary Examining Authority on:

25 October 2000 (25.10.00)

☐ in a notice effecting later election filed with the International Bureau on:2. The election ☒ was☐ was not

made before the expiration of 19 months from the priority date or, where Rule 32 applies, within the time limit under Rule 32.2(b).

The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland Facsimile No.: (41-22) 740.14.35	Authorized officer R. Chrem Telephone No.: (41-22) 338.83.38

PCT

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference JEB/MPC/4905	FOR FURTHER ACTION see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.	
International application No. PCT/GB 00/ 01249	International filing date (day/month/year) 31/03/2000	(Earliest) Priority Date (day/month/year) 01/04/1999
Applicant THE SECRETARY OF STATE FOR DEFENCE		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 3 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

- a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

- b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing:

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority in written form.

☐ furnished subsequently to this Authority in computer readable form.

☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ **Certain claims were found unsearchable** (See Box I).

3. ☐ **Unity of Invention is lacking** (see Box II).

4. With regard to the **title**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established by this Authority to read as follows:

5. With regard to the **abstract**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the **drawings** to be published with the abstract is Figure No.

☒ as suggested by the applicant.

☐ because the applicant failed to suggest a figure.

☐ because this figure better characterizes the invention.

1
☐ None of the figures.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/GB00/01249

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, pages:

1-18 as originally filed

Claims, No.:

1-30 as originally filed

Drawings, sheets:

1/4-4/4 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/GB00/01249

☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application.

☒ claims Nos. 21, 27 to 30.

because:

☐ the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (*specify*):

☒ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. 21, 27 to 30 are so unclear that no meaningful opinion could be formed (*specify*):
see separate sheet

☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.

☐ no international search report has been established for the said claims Nos. .

2. A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions:

☐ the written form has not been furnished or does not comply with the standard.

☐ the computer readable form has not been furnished or does not comply with the standard.

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N) Yes: Claims 7,20,22-26

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/GB00/01249

	No:	Claims	1-6,8,10-15,17-19
Inventive step (IS)	Yes:	Claims	
	No:	Claims	7, 16, 20, 22-26
Industrial applicability (IA)	Yes:	Claims	1-20,22-26

2. Citations and explanations
see separate sheet

VI. Certain documents cited

1. Certain published documents (Rule 70.10)

and / or

2. Non-written disclosures (Rule 70.9)

see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:
see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:
see separate sheet

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB00/01249

Concerning **section III**:

Claim 21 is completely void of any structural feature and thus cannot be regarded as sufficiently clear to be examined.

Claim 27 is a "product-by-process" claim not referring to any structural features and thus, cannot be regarded as a sufficiently clear definition of a fibre.

Claims 28 and 29 are omnibus claims referring to drawings and thus not defining positive features.

Claim 30 refers in a general way to a method, however, lacks any method step.

The intended scope of the above claims are thus left completely obscure.

Concerning **section V**:

1. The following documents are cited:

D1: WO 9900685 A

D2: BARKOU S E ET AL: 'SILICA-AIR PHOTONIC CRYSTAL FIBER DESIGN THAT PERMITS WAVEGUIDING BY A TRUE PHOTONIC BANDGAP EFFECT' OPTICS LETTERS,US,OPTICAL SOCIETY OF AMERICA, WASHINGTON, vol. 24, no. 1, 1999, pages 46-48

2. D1 discloses (see abstract, claims 1 to 31, p.5, 3rd to 5th para., p.6, 1st para., p.11, 2nd and 3rd para., p.12, 1st para., p.13, 1st para.,p.17., last para., p.18, 2nd and 3rd para.) a photonic crystal fibre comprising a core = region of lower refractive index which is substantially surrounded by a cladding which includes holes arranged in a substantially periodically way, i.e. hexagonal (see claims 3 and 18 of D1). The core region is circular and should exceed 5 μm and may have a diameter of at least 20 μm . Thus, the longest transverse dimension of the core (=section of lower refractive index) is longer than the single, shortest period of the cladding, i.e. the pitch (see section VIII). As regards the definition of the cladding index as being "not less than that of the core", it is observed that this is understood as synonymous to "equal or greater" and therefore, the feature "the core region has a smaller or lower refractive index than the cladding" appears to be disclosed by D1. (Art.33.2 PCT).

However, even when challenging this fact, the selection of a low index core region appears to be a selection which would not involve an inventive step (see also D2, abstract, references to central air hole forming a "lower index region"). Moreover, D2 already teaches that the diameter of the central hole may be tailored according to needs (p.47, right col.).

As regards dependent claims 2 to 6, 8 and 9 are also found in D1 (see passages already cited, low pressure region is identified with vacuum as set out in claim 12 of D1).

As regards claim 7, as already set out above, the use of central holes as cores is known from D1 and thus cannot involve an inventive step.

As regards independent claim 10 and dependent claim 11, the same objection as set out with respect to claim 1 applies (see also section VIII).

As regards claims 12 to 15, 17 to 19, these claims define devices or systems including the photonic fibre according to the previous claims, however, D1 already refers to the defined types of use (see p.20, last para., cls.19 and 30, Art.33.2 PCT). The use of photonic crystal fibres in telecommunication systems or networks moreover appears to be a straightforward selection when taking into consideration the purpose of the fibres, i.e. establishing a single-mode low loss fibre link.

Claim 16 refers to a sensor, however, sensor applications for "hollow" fibres are well-known in the art (Art.33.3 PCT).

Method claim 20 defines the normal way of producing photonic crystal fibres (see D1, p.17, 1st and 2nd para.). The provision of some sort of appropriate "spacer" (=truncated cane) in order to establish a central cavity appears to be a straight-forward application of normal laboratory skills when aiming at the provision of a central "defect site" in the form of the desired "large" hole (Art.33.2 PCT, claims 22 and 23).

The use of capillaries and triangular arrays thereof forms part of the state of the art, as well as their filling with air or materials other than air (see D1, passages already cited, claims 24 to 26).

As regards claims 21, 27 to 30, see section III

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB00/01249

Concerning **section VI**:

Certain published documents (Rule 70.10)

Application No
Patent No Publication date
(day/month/year) Filing date
(day/month/year) Priority date (valid claim)
(day/month/year)

WO 9964903 A	16.12.1999	21.05.1999	09.06.1998
--------------	------------	------------	------------

The above cited document may be relevant for assessing novelty of all claims in subsequent national procedures.

Concerning **section VII**:

The features of claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).

Independent claims 1 and 18 are not in the two-part form in accordance with Rule 6.3(b) PCT, which in the present case would be appropriate, with those features known in combination from the prior art (document D1) being placed in a preamble (Rule 6.3(b)(i) PCT) and with the remaining features being included in a characterising part (Rule 6.3(b)(ii) PCT).

Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents D1 and D2 are not mentioned in the description, nor are these documents identified therein.

Concerning **section VIII**:

1. The expression "longer than a single, shortest, period of the cladding" is vague and thus interpreted as referring to the shortest distance of the holes of the periodic arrangement (pitch).

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB00/01249

2. Claim 10 refers to the intended result "support at least one transverse mode" but not the respective features, which apparently are related to the core and cladding arrangement. When taking into account the complete application, it appears that claim 10 is directed to the same fibre as claim 1 and thus, a lack of conciseness occurs, too.
